

# Haven't Participated Yet?

## Make sure you are counted in the 2010 Census

If you have not participated in the 2010 Census yet, you may call 1-866-872-6868 and provide your information over the phone (through July 30).

Note that this summer, we will visit addresses that were added to our address list too late to receive a form, so it is possible you may still be visited by a census taker. You may have already been included in the census, without knowing it.

- We sent about 600,000 census takers out to knock on the doors of households who had not responded to the census. If we could not get a response at your door step, we would have checked with neighbors or another knowledgeable source to make sure your household is included in the census.
- If you live in a group housing situation such as a college dorm, nursing home or military barracks, we may have worked with facility managers to collect your information.
- It is also possible that someone else in your household may have completed a census form on your behalf.
